**Hollander Hospitality Continues its Sustainable Energy Efforts in its Newest Hotel, Delta Hotels by Marriott Seattle Everett**

**Everett, Washington – June 27, 2018** - Premier hotel development and management company, Hollander Hospitality, has completed an \$18 million-dollar renovation of the former Holiday Inn Downtown Everett and announced the official grand opening of the 232-room Delta Hotels by Marriott Seattle Everett, in Everett, Washington. The former Holiday Inn was the most recent acquisition for Bellingham, Washington-based Hollander Hospitality, a local, privately-owned Northwest company, committed to investing in the region.

This is Delta's first branded hotel in the Pacific Northwest and signals the continued global expansion of the brand since its endorsement into the Marriott signature portfolio. This latest project by Hollander Hospitality is another example of their commitment to implementing sustainable technologies that conserve energy, reduce the carbon footprint and offer the best possible guest experience.

As part of Hollander Hospitality's green initiatives, they have once again invested in NuTek International's Ozone Laundry Support Systems™ (OLSS) for their Delta Hotel's On-Premises Laundry.

Loren Terpstra, Hollander's Director of Operations stated "NuTek has provided us with their cutting-edge Ozone Laundry Support Systems and we have seen amazing results in both the cleanliness of our linen/terry and significant energy savings. Currently we have their OLSS installed in all of our laundry operations..."

NuTek's UL Recognized ozone technology saves on water, sewer, gas, electric and laundry chemicals for each load of light to medium soiled linens processed. It has been specifically tested and proven to extend linen life by 23%. It has also been specifically tested and proven to kill 99.99% of all bacteria and viruses. Rinsing all linens in ozonated cold water assures superior sanitation, from guest room sheets and towels to housekeeping rags and mops.

Jay Montanus, CEO of Sustainable Solutions, LLC, dba NuTek International, stated “We’ve enjoyed supporting Hollander’s commitment to sustainability and improving their laundry operations since 2013. They identified immediate evidence of energy savings and improved laundry results and since then NuTek has been invited to provide our OLSS in every renovation or new development Hollander has brought to the market.”

**HOLLANDER  
HOSPITALITY**

#### **About Hollander Hospitality**

Bellingham, WA based Hollander Hospitality is proud to be a local privately-owned Northwest company, offering some of the finest hotel accommodations. As leaders in the hospitality industry, operating multiple award-winning hotels, the company has relationships with some of the world’s most recognized brands, including Courtyard by Marriott, Crowne Plaza Hotels & Resorts, Fairfield Inn & Suites by Marriott, Holiday Inn Express & Suites, and Best Western Premier. As the company continues to expand our portfolio, it remains committed to the Hollander heritage of offering the best customer service, quality, and experience possible.

#### **About NuTek International**

Sustainable Solutions LLC dba NuTek International, has been helping customers save energy and reduce operating costs for more than 20 years. This dedication has resulted in a cleaner, safer, more efficient On-Premises Laundry environment and has earned NuTek the distinction of being the industry leader in ozone and cold water washing. NuTek’s Ozone Laundry Support Systems™ (OLSS) is the only ozone laundry equipment to have earned UL Recognition specifically for use with commercial washers, meeting safety standards in both the US and Canada. The technology supports customers’ objectives to assure their guests, owners and investors that they have implemented sustainable, measurable initiatives. As a Certified Woman-Owned Business, NuTek is proud to be a US manufacturer, with its factory in St. Augustine, FL, distributing energy saving products around the globe.
